

runZero for Mergers & Acquisitions (M&As)

Successful transitions start with complete visibility.

Unify operations without the worry of unknown risks

Hidden plumbing or wiring issues can turn a dream home into a nightmare. M&As are no different — without a deep dive into the digital landscape, you could inherit serious cybersecurity risks. Overlooked vulnerabilities, like cracks in a foundation, can wreak havoc long after the deal is done.

While M&As unlock new business opportunities, they also expand your attack surface. With tight due diligence timelines, the real question isn't just, "How do we secure this?" — it's, "What exactly are we securing, and what risks are hiding beneath the surface?" Even if other organizations are confident they have accounted for everything, can you fully trust their assessment?

That's where runZero comes in.

Think of runZero as your cybersecurity home inspector. Our active scanning, passive discovery, API integrations, and advanced fingerprinting provide a complete, real-time view of internal and external assets — without agents, credentials, or reliance on other teams. We quickly uncover unknown assets and exposures, so you can focus on securing what truly matters.

The result?

Full visibility, seamless integrations, and the confidence to move forward — at the speed that M&As demand.

M&A risks at a glance

Hidden threats

53% of organizations found unknown devices after fully integrating a new acquisition.

Killer connections

50% of organizations reported that risky connected devices posed the greatest threat during the transition process.

Risky transitions

80% of organizations uncovered previously unknown or undisclosed cybersecurity risks during the integration process.

Tick tick, tick tick

64% of security personnel didn't have enough time to complete due diligence before an acquisition.

Deal breakers

53% of organizations encountered a critical security issue during due diligence that jeopardized deals.¹

1. 2022: The Role of Cybersecurity in Mergers and Acquisitions Diligence.

As we were considering alternatives, I ran a couple of tests with another tool we use for assessments. The runZero scan completed in 2 hours, 8 minutes and identified 480 assets. The other scanner took 13 hours, 10 minutes and identified 388.

Scott Stevens

Integrity Technology Solutions

See Clearly, Move Quickly

runZero's minimal setup time gives you insights in hours, not days

- Fast, flexible deployment options
- Scalable across environments
- Lightweight & network-friendly
- Runs alongside existing tools
- Complete scan frequency control

Make the Unknowns Known

runZero finds every asset, so their blind spots don't become yours

- Complete internal & external attack surface visibility — IT, OT, & IoT
- Safe active scanning, passive discovery, & API integrations
- Deep device fingerprinting
- Unmanaged & unknown discovery

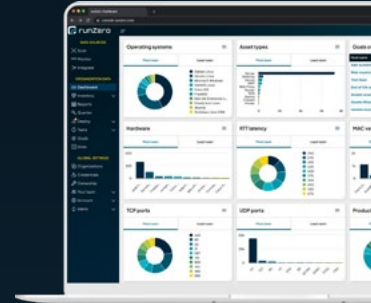

Integrate Without Inheriting Risk

runZero goes where agents can't, detecting the risks they miss

- Native detection beyond CVEs
- Insights & actionable risk dashboards
- Business context-based prioritization
- Vulnerability scan data integration
- Easy rescans to confirm remediation

We quickly find what others miss

Other solutions can't keep up with M&As. Slow rollouts, blind spots, and CVE overload leave you missing deadlines and inheriting risks. runZero delivers full-spectrum visibility in minutes. Our advanced fingerprinting goes beyond agents to reveal hidden threats, prioritizing critical risks so you know where to act first.

Deployment Model & Time to Discovery	Attack Surface Visibility	Exposure Detection	Actionable Insights	Corporate Risk & Assurance
runZero				
Tackles M&A due diligence quickly, with no agents or authentication, giving actionable results in hours.	Uncovers every asset — internal, external, IT, OT, IoT— including unmanaged and unknown devices.	Goes beyond agents to expose misconfigurations, segmentation flaws, and missing security controls.	Moves from discovery to mitigation faster with meaningful data to prioritize critical issues.	Provides clear, comprehensive reports and security posture insights to reassure risk teams and executives.
Other Solutions				
Consume time and resources with complex rollouts that rely on agents, appliances, and authentication.	Cover only known assets, leaving blind spots for attackers to exploit in the shadows.	Focus on CVEs and known threats, burying serious threats behind trivial results and unchecked risks.	Use ineffective risk-scoring systems that focus on minor threats while real dangers persist.	Fail to provide complete visibility, leaving organizations vulnerable throughout the integration process.

runZero delivers the most complete security visibility possible, providing organizations the ultimate foundation for successfully managing exposures and compliance. With a world-class NPS score of 82, runZero has been trusted by more than 30,000 users to improve security visibility since the company was founded by industry veteran HD Moore.
