![runZero]

See & secure your total attack surface.
Even the unknowns & unmanageable.

To defend against anything, you have to see everything.
runZero provides a single source of truth for exposure management across your total attack surface: internal, external, IT, OT, IoT, mobile, and cloud. Providing the most complete and accurate visibility into every asset and exposure, runZero helps mitigate risks faster, meet compliance requirements, and ensure you continuously discover the assets and exposures that others miss.

No agents, no authentication, no appliances required.
runZero uses the industry's only agentless combination of active scanning, passive discovery, and API integrations to uncover and safely fingerprint every asset across your internal and external attack surfaces with unprecedented depth and accuracy, including unknowns and unmanageable devices.

Uncover hidden risks that other security tools overlook.
runZero delivers insights into exposures that evade other solutions. Our innovative fingerprinting methodologies analyze each device's attributes, connections, and security hygiene to spotlight hidden risks and pinpoint critical issues instantly, without relying on signatures or rescanning. This empowers your security team to move from discovery to mitigation faster, stay compliant, and shrink the window of exploitability.

NO AGENTS • NO AUTHENTICATION • NO APPLIANCES

TOTAL ATTACK SURFACE VISIBILITY
→ Discover every IT, OT, & IoT asset, including unknowns
→ Unify visibility across internal & external attack surfaces
→ Fingerprint every asset with unmatched depth & accuracy

FULL-SPECTRUM EXPOSURE DETECTION
→ Uncover elusive exposures other tools miss
→ Respond to 0-days instantly without rescanning
→ Detect risks posed by OT, IoT, & unmanageable assets

RISK PRIORITIZATION & INSIGHTS
→ Prioritize critical exposures with data-driven risk findings
→ Gauge impact with business context & detailed attributes
→ Accelerate risk reduction with remediation guidance

COMPLIANCE, REPORTING, & KPIs
→ Comply with requirements for discovery & monitoring
→ Accelerate & streamline compliance reporting
→ Track security posture with goals & improvement metrics

Trusted by 500+ customers, including many brands you know & love.

A powerful fusion of discovery methods provides unparalleled, in-depth visibility into IT, OT, IoT, mobile & cloud.

Unrivaled Active Scanning That's Safe for IT, OT, & IoT

Our proprietary active scanning technology is unmatched, discovering everything on your network, including unknown and unmanageable devices, with an unparalleled depth of data. Extract rich insights into OSs, services, hardware, and installed software through advanced fingerprinting proven safe for even the most sensitive OT and IoT environments.

Passive Discovery That's Always-on

Our groundbreaking passive discovery approach outperforms traditional methods, delivering greater efficiency, faster deployment, and instant results. It delivers always-on discovery and coverage for fragile OT environments where active scanning is not permitted, providing detailed fingerprinting and superior data accuracy.

Seamless Integrations for Unified Data & Insights

Pre-built API integrations and an SDK empower you to connect with leading cloud providers, EDRs, MDMs, and vulnerability scanners to create a single source of truth across complex environments. Effortlessly correlate data and enrich asset details for a complete view in runZero, then leverage robust egress integrations to integrate runZero insights into existing workflows.

SINGLE SOURCE OF TRUTH

runZero

runZero provides a single source of truth for exposure management across your total attack surface: internal, external, IT, OT, IoT, mobile, and cloud. Providing the most complete and accurate visibility into every asset and exposure, runZero helps you mitigate risks faster, meet compliance requirements, and ensure you continuously discover the assets and exposures that others miss.
